

## FILLERS

Dermal fillers, more specifically hyaluronic acid (HA) fillers, are aesthetic treatments designed to restore skin elasticity and youthfulness, reduce wrinkles and enhance facial contours. Hyaluronic acid, a naturally occurring substance in the body, helps to hydrate the skin and restore lost volume. Filler treatments are quick, with minimal recovery time and provide immediate and natural-looking results. They are ideal for those seeking to enhance facial symmetry, smooth wrinkles or restore lost volume without the need for surgery. The results typically last between 6 to 18 months, depending on the treatment area and the type of filler used.

These procedures provide immediate rejuvenation and facial refreshment without surgical intervention.

<b>Dermal fillers: Lips</b> Adding volume to lips, defining lip contours and restoring natural fullness.	<b>340 €</b>
